The following is an examiner's statement of reasons for allowance: In view of the disclosure in the instant specification that the "composite dielectric layer" is a reaction product or combination of the two layers it would not require undue experimentation to determine what materials used in semiconductor processing produce these results. Also, although Ma et al '340, Lee et al '536 and Yamamoto 2002/0153579, newly cited, disclose a gate dielectric comprising alternating layers of high dielectric constant materials and aluminum oxide and annealing the references fail to disclose or suggest nitridation of any of the layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (571) 272-2800. See MPEP 203.08.
